

(Continued from outside front cover)

- Instantaneous Frequency Estimation of Nonstationary Jammer Based on TVAR for DSSS
Na Liang and Jining Feng 531
- Classification Model of Diabetic Retinopathy Based on a Lightweight Feature-Enhanced Residual Swin Transformer
Na Li and Kai Ren 542
- V-TRACE: Persistent Tracking Misbehaving Vehicles under Pseudonym Changes in V2X Networks
Juntaek Lee, Jiwoo Lee, Chanmin Kim, and Jiwon Seo 555

- Application of Data Mining Technology in the Selection of Teaching Evaluation Indicators and the Construction of Teaching Information Evaluation Model in Colleges and Universities
Jiangxia Han 457
- Design of In-Vehicle Life Detection System Based on FMCW Millimeter-Wave Radar
Weiquan Li, Li Li, Songlin Wei, and Ying Wang 471
- Improvement of Object Classification Performance Using a Fusion Optimizer
Si-Ung Kim and Nammee Moon 484
- Application of Virtual Simulation in Traditional Chinese Medicine Processing Education
Qi Zhang, Zixi Song, and Huaying Zhou 494
- Single-Object Fall Detection Using Pose Estimation 3D Coordinates via Generating 3D Object Coordinates from 2D Object Coordinates
Jinmo Yang, Kidu Kim, and R. Young Chul Kim 508
- DFPINet: Dual Feature and Progressive Interaction Network for Point Cloud Registration
Xinhua Lu, Hui Wan, Lingxiao Zhang, Hao Zhang, and Zheng He 517

Published on October 31, 2025

The Journal of Information Processing Systems is the official journal of Korea Information Processing Society. Abbreviated title is 'J Inf Process Syst'. It was launched in 2005. It is published bimonthly, on the last day of February, April, June, August, October and December of each year. Our Journal has been exclusively online since June 2024.

Aims and Scope

The JIPS is a peer-reviewed bimonthly journal that publishes high-quality papers after subjecting them to a rigorous review process. It publishes diverse papers, including theoretical research contributions presenting new techniques, concepts or analyses; experience reports; experiments involving the implementation and application of new theories; and tutorials on state-of-the-art technologies related to information processing systems. In addition, the journal's editorial board selects featured articles with outstanding contributions and results, and introduces them on the journal's homepage. The subjects covered by this journal include, but are not limited to, topics related to a) computer systems and theory; b) multimedia systems and graphics; c) communication systems and security; and d) software systems and applications. To be accepted, however, a paper must be judged to be truly outstanding in its field and to be of interest to a wide audience.

Subscription Information

Korea Information Processing Society (KIPS) will send the Journal of Information Processing Systems for free to individuals, libraries and educational institution worldwide. Full text PDF file are also available at the official website (<http://jips-k.org>).
